

Who won the election?

By Michael Charles Master (author of Save America Now, Rules for Conservatives, etc.)

Did you watch the election returns on Tuesday night? Did you stay up all night? At about midnight on the east coast, Trump led in all the battleground states by large margins. The betting odds were more than 75% for Trump to win. Then for some unexplainable reason, Wisc, Mich, Pa, NC, and NV all stopped counting votes simultaneously... in unison.... took a "pause" ... at around 1 AM. None of those states counted any additional votes for the next 3 hours. So what did they do for those 3 hours?

Let me point out a couple of things:

- 1. All of those 5 states have Democrat governors.**
- 2. Suddenly during the 3 hour shut down, in the dead of night when most people were sleeping, all those states found enough votes for Biden to catch Trump. 5 for 5. At midnight in Michigan, Trump was ahead by 5% (400 thousand votes) with 80% of the votes already counted. When the next 10% of votes of about 400,000 were counted from Wayne County (Detroit), then suddenly Biden caught Trump with 90% of the votes in. Biden made up 5% with 10% of the total vote. That means that all the votes (close to 100%) from Wayne went to Biden. That also means that practically all registered voters voted in Wayne County. Does anyone believe any of that is possible? The same thing happened in Madison, Wis, In Raleigh, NC, in Las Vegas, NV, and could be happening in Phil, Pa by Friday. So why did all those Democrat stronghold cities take a "pause" to report their votes?**
- 3. Not one pundit questioned why a shutdown in counting votes happened in all those states simultaneously. Not one. Not even on FOX. Not one questioned how almost all of the newly counted votes in those battleground states went to Biden. Only NewsMax pointed out the coincidence of it happening in those 5 states with Democrat governors with Trump ahead before the "pauses."**
- 4. Wisconsin is now reporting 3,239,920 votes cast when there are only 3,129,000 registered voters on record. More people voted than actually registered. When questioned, the Democrat Sec of State says there are 3.6 million registered voters from late registrations. Even if there are 3.6 million registered voters, that means that 90% of them**

voted, when the average was 55 to 60% across the USA. How did almost all votes from Madison go for Biden? Almost 100% of registered voters, not just votes? Did ballot harvesting happen? How about in those other battleground states?

5. CNN, FOX, NBC, ABC, CBS all refused to call the elections in Tx and Fla until almost all votes were counted, yet FOX called Az only 30 minutes after the polls closed with less than 50% of the votes. Arizona had a million outstanding votes in Republican Maricopa County with Biden ahead in the state by only 100,000 when Az was called for Biden.

If you think that the media cartel was hard at work demonizing Trump for the last 4 years ... 94% negative Trump reports.... then it was in full swing last night at protecting those Democrat governors in the battleground states.

Think about this for a moment: "resist" by Democrats from the first day that Trump was elected, recounts, no peaceful transition of power, impeachment, 3 years of false accusations about Trump colluding with Russia to affect the 2016 election, Mueller, Comey/Clapper/Brennan with the FISA requests and the Steele Dossier paid by Hillary Clinton, 22 FBI agents lost their jobs because of spying on Trump, riots/looting/violence, continued polls that proved to be wrong, \$400 billion by Soros and Bloomberg for Biden, Wall Street 4 to 1 in donations to Biden, lack of coverage about the Bidens' relationships with China/Russia/Ukraine/Burisma, and then Covid, covid, covid around the clock by the media ... with little mention of the record economic and international results by Trump.

Covid became the reason for the unsolicited mail out of ballots by Democrat governors. Covid was used to scare voters and to distract them from Trump accomplishments. Covid was used as the reason to shut down economies in Democrat run states. Let's see what happens with Covid now that Democrats and the media no longer need it.

So did those battleground states run by Democrats use ballot harvesting or any other types of election fraud? How did the vote tallies change so dramatically after those Democrat governors "paused" in their election counts in the dead of night? In all 5 Democrat controlled battleground states? If the media, Democrats, and deep state could be in such collusion against Trump for 4 years, then how hard is it to question collusion in ballot counting last night by those Democrat governors?

What gets lost with a Biden election? for starters: any investigation of Biden with Burisma and China, the Barr investigations, the Durham investigations, the investigations of deep state players, and Constitution integrity with DC as a state and with packing the Supreme Court. Democrats had lots on the line so they practiced "the end justifies the means" just as Alinsky instructed. They cheated and the media helped.

Who won the election? Average working Americans lost. Election integrity lost. No matter who won, America got less great.
