A deep dive into the results in Milwaukee shows a similar pattern The Gateway Pundit found in Detroit using Dr. Shiva found in Michigan. The higher percentage of votes Trump to Joe Biden.

We've also previously reported the number of votes that went statistical technique known as

Audit Statistical Technique Known as 'Benford Analysis' Points to Milwaukee Precincts as Central Point to Uncover Fraud

By using the audit statistical technique known as 'Benford Analysis' the precincts in Milwaukee are where the focus of any fraud audit in Wisconsin should take place. In Wisconsin on the night of the election, President Trump was winning early into the morning. However, when Americans woke up on Wednesday Joe Biden had somehow taken ... Continue reading

Next we reported on a pattern identified in Michigan's results by Dr. Shiva from Massachusetts, where Trump votes were systematically switched from President Trump to Joe Biden in consistent manner. This pattern is too consistent t

and therefore indicates 'monke　GP

Today we report the results of a similar analysis of the results in Milwaukee based on Dr. Shiva's analysis. We analyzed precincts in Milwaukee and found again that votes were transferred from President Trump to Joe Biden in an unnatural pattern indicating fraud.

According to Dr. Shiva and others, the voting machines used in the US in the current election and in prior elections have the ability to store votes not as binomial characters but as fractions. This allows these machines to weigh votes for candidates and change elections based on this weighting.
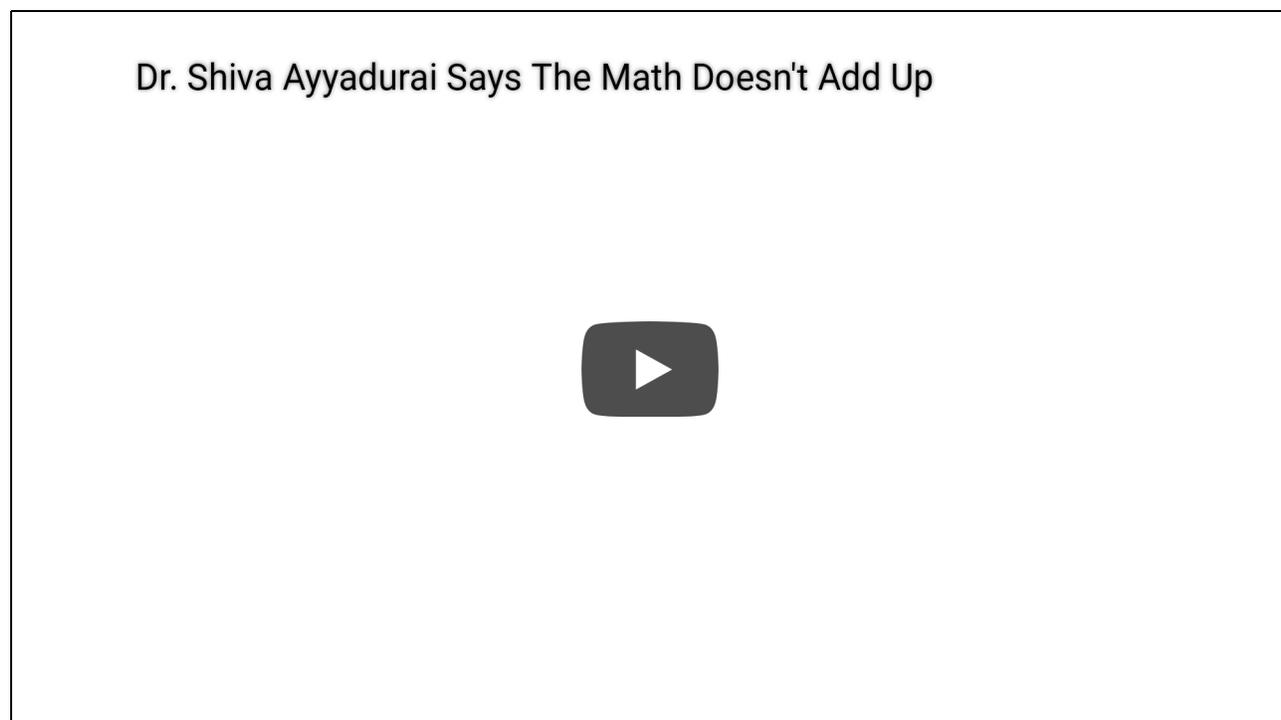

There is NO REASON why this feature should be included on a voting machine.

There is only ONE REASON to **GP**
– to STEAL elections.

For example, if you like a candidat
she receives. If you don't like a ca
vote for every vote that person re

weighting such that all votes are allocated based on you weighting. At the end of the day you count ballots and all are counted but the number of votes for the first candidate is nearly twice as much as the number of votes that candidate received and half as much of the number of votes for the second candidate. This can be done because we've found that votes are stored as decimals in US voting machines providing for manipulation and voter fraud.

Dr. Shiva was on with conservative talk show host Larry Elder and he explained this process in a short interview held during the past week:
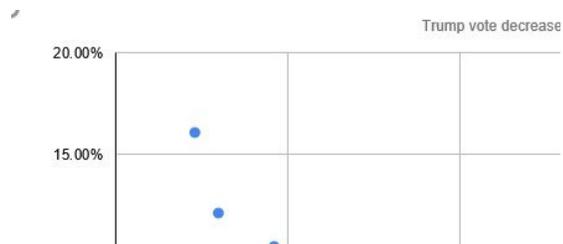

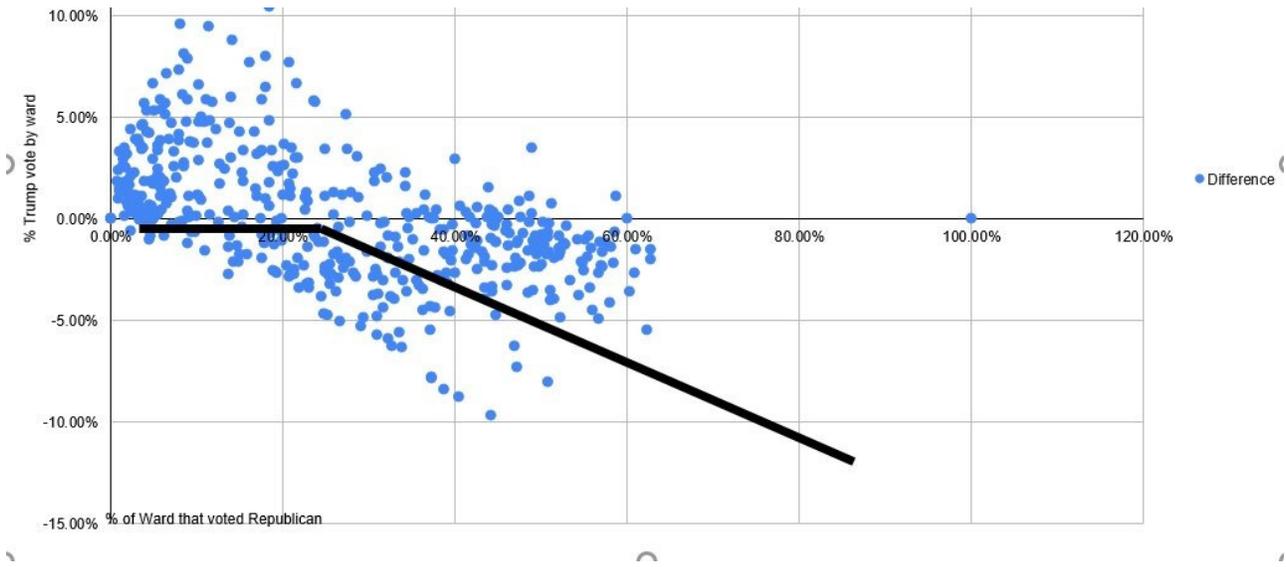

Dr. Shiva Ayyadurai Says The Math Doesn't Add Up

The longer version of Dr. Shiva's talk regarding the 2020 steal is provided below. In this video Dr. Shiva and ̇ ̇ ̇ ̇ ̇ ̇ ̇
Michigan and how in three countie   **GP**
transferred from President Trump
machines used in these counties ̇

This leads us to today.

A data scientist who remains anonymous performed **a review of the data in precincts in Milwaukee**. His conclusion is very similar to Dr. Shiva's in Michigan in three counties. The more Republican the makeup of a precinct, the more votes that were taken away from President Trump and 'switched' to Joe Biden. Also, ironically these votes move in a linear fashion which is very disturbing and highly, highly unlikely. The pattern indicates that these precincts were manipulated and votes were removed from President Trump and allocated to Joe Biden.

As Dr. Shiva would say, 'this is too   of a   Our analysis of precincts in Milwaukee shows the same hocke   **GP**
unlikely, and similar to what Dr. Sh

Based on the above analysis for Milwaukee, the higher a precincts percent of Republican votes for Congress, the lower the percent of Trump votes for President. This doesn't make sense and is highly, highly unlikely. The reasonable expectation is the more the Republican votes for Congress, the more the number of Trump votes as well.
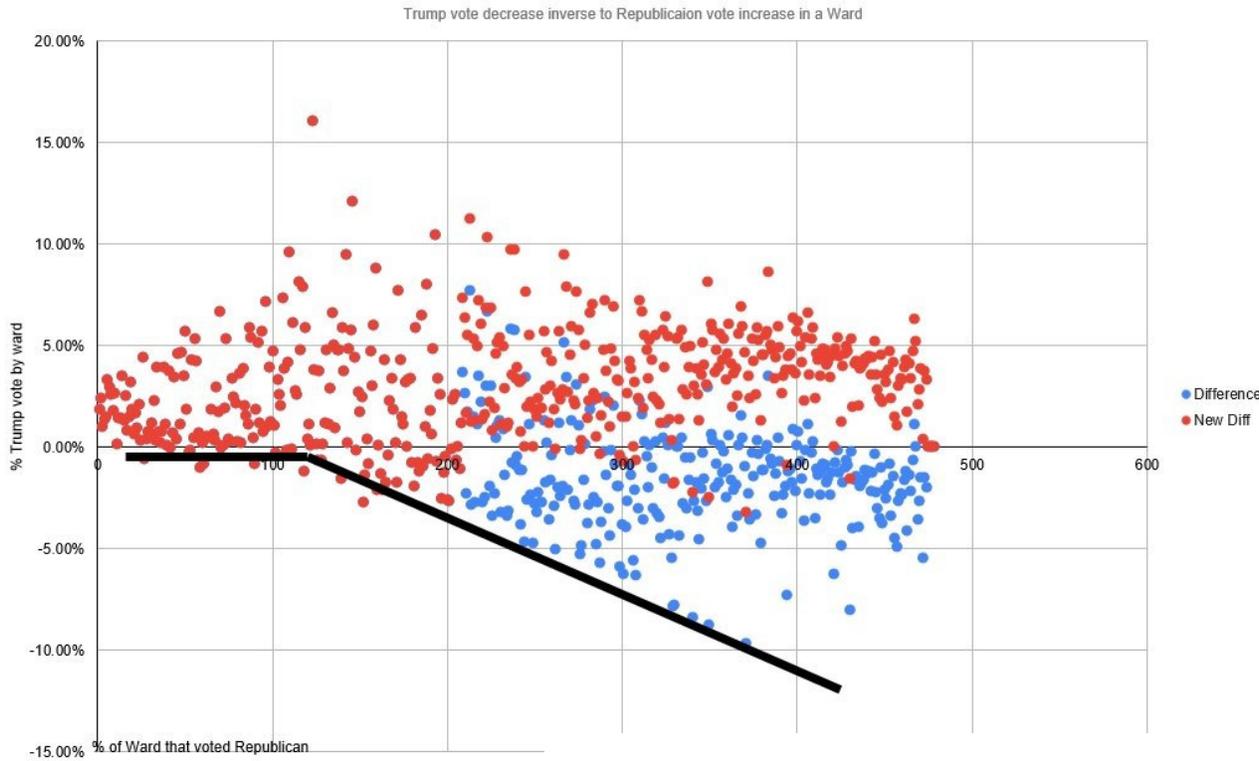

The fact that this pattern occurred in swing state Wisconsin in the exact same pattern as was identified in swing state Michigan, provides additional information on a systemic fraud across the country in our 2020 Presidential election.

We compared the Milwaukee results to Dane County Wisconsin results and they are very different. In Dane county the percent of Trump votes in the county is very similar to the percent of Republican votes. This is expected.

In Milwaukee, when statistically eliminating the current highly unlikely and impossible results (i.e. fraud), the more likely result is 30,700 more votes for President Trump and a corresponding 30,700 votes less in Joe Biden's column. The total being a 61,400 vote swap.

With Biden currently leading P
this analysis at a precinct level
Trump to the win column in W

The more we dig into the

patterns that don't make any sense at all. The reason the numbers don't make statistical sense is because there is something going on, and it's more than likely fraud.
