[President Donald Trump](#) dropped a massive Truth Social bombshell Tuesday, revealing that the U.S. Census Bureau has begun cross-checking 2020 voter records against citizenship data, and the early results are devastating for the stolen election narrative.

In a post that should send shockwaves through the deep state and the corporate media that spent years gaslighting Americans, Trump wrote:

“The Census Bureau has begun checking the Voter Records from 2020 against their Citizenship Records. On the first 128,000,000 Voters, the Census Bureau proves that over 24,000 Noncitizens voted illegally! The Census Bureau is going to analyze the next 32,000,000 Voters, and this number will explode. I WON THE ELECTION! We must pass THE SAVE AMERICA ACT. Thank you for your attention to this matter!”

According to official U.S. Census Bureau graphics, the preliminary analysis of the 2020 general election shows:

- **160 million** ballots cast
- **128 million** voter records linked to U.S. citizens
- **24,000+** voter records linked to noncitizens
- **32 million** records that remain to be analyzed

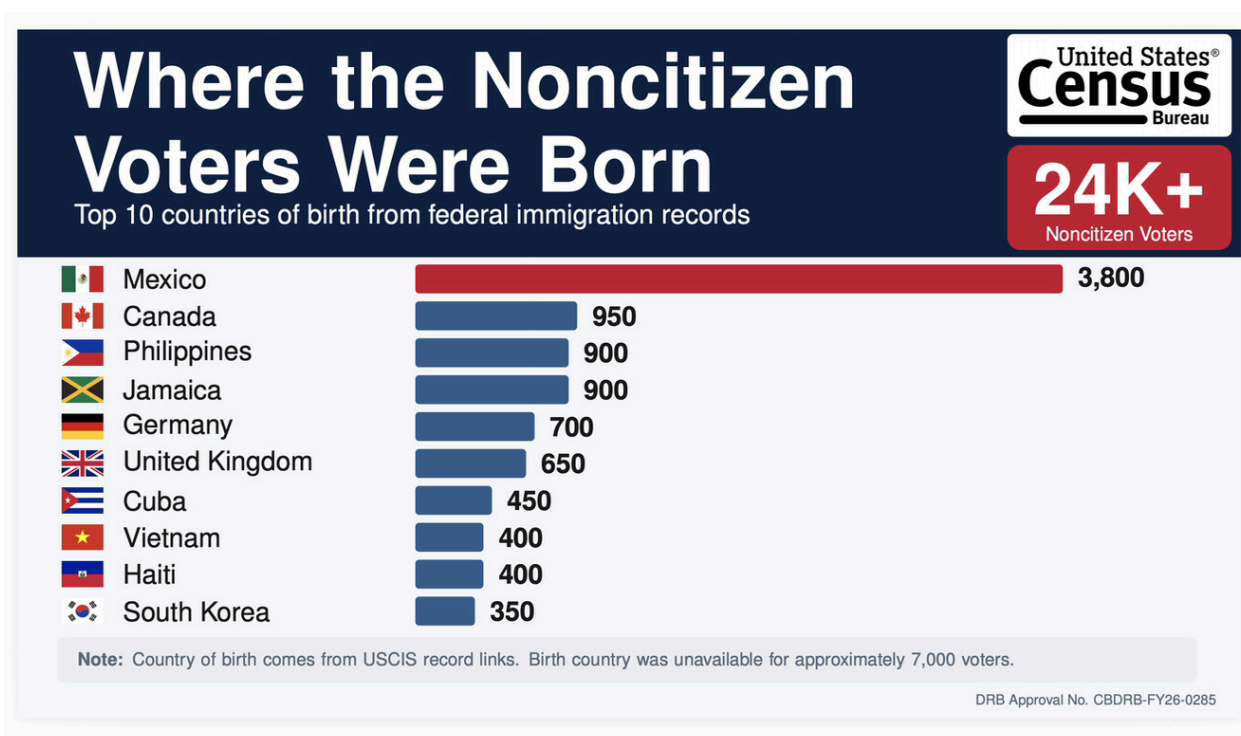

That's 24,000+ confirmed noncitizen voters on just the first 128 million records. The remaining 32 million have not even been fully processed yet. As Trump correctly noted, that number is only going to explode.

The Census Bureau's own materials make clear these are not "clerical errors" or "mistaken registrations." Noncitizen status was determined by the **complete absence** of any proof of citizenship combined with affirmative federal records proving the individual was a noncitizen:

NO U.S. birth record. **NO** record of becoming a citizen. **NO** U.S. passport. **NO** government citizenship record. **NO** other proof of citizenship. **AND**

- A green-card noncitizen record
- A visa issued to a noncitizen
- A foreign-student noncitizen record
- An enforcement noncitizen record
- A DACA noncitizen approval
- A noncitizen code held by an agency
- A taxpayer ID issued to a noncitizen

In other words: zero evidence of citizenship + multiple federal records confirming noncitizen status = illegal voters who cast ballots in the [2020 election](#).

The top 10 countries of birth for the identified noncitizen voters (from federal immigration records) tell the story:

- **Mexico:** 3,800
- **Canada:** 950
- **Philippines:** 900
- **Jamaica:** 900
- **Germany:** 700
- **United Kingdom:** 650
- **Cuba:** 450
- **Vietnam:** 400
- **Haiti:** 400
- **South Korea:** 350

Note: Birth country data was unavailable for approximately 7,000 of the noncitizen voters.

This is not a “myth.” This is the Census Bureau’s own beginning analysis.

[The Gateway Pundit](#) has repeatedly documented the failure of Democrat-run states and the federal bureaucracy to keep noncitizens off the voter rolls. We have covered the SAVE Act (and its stronger successor, the SAVE America Act) extensively as the common-sense solution that requires documentary proof of citizenship to register and

photo ID to vote. We have highlighted how Senate Republicans, including certain RINOs who blocked stronger election integrity measures, have failed to deliver.

President Trump is now demanding action. The data from the Census Bureau itself confirms what millions of Americans already knew: the 2020 election was compromised by illegal voting. And the remaining 32 million records have not even been fully analyzed yet.

The corporate media and Democrat operatives spent five years screaming that any discussion of noncitizen voting was a “conspiracy theory.” Now the U.S. Census Bureau’s own numbers are out, and they prove the opposite.

Pass the SAVE America Act. Secure the elections. Restore the integrity of the vote.
